

Transforming
Indian Thermoforming Industry

PROUDLY INTRODUCING

**Latest Technological
3-station Thermoforming Machine**

POLYFORMTM
TECHNOLOGIES 
KNOWLEDGE VIRTUES POWER

In wake of the current scenario in packaging industry, hygiene, safety, longer shelf-life, sustainability & convenience have become the key words.

Realizing this immense potential, Mr. Bhavesh Bhojani, a hard-core visionary and founder of **POLYFORM** TECHNOLOGIES, backed by his vast experience has ventured into the field of manufacturing latest technological 3-station thermoforming machine. First of its kind to be indigenously designed & manufactured in India, it will prove to be the most efficient & economically viable solution for the ever changing packaging world

Robust loading with auto unwinder

Servo controlled frictionless chain transport

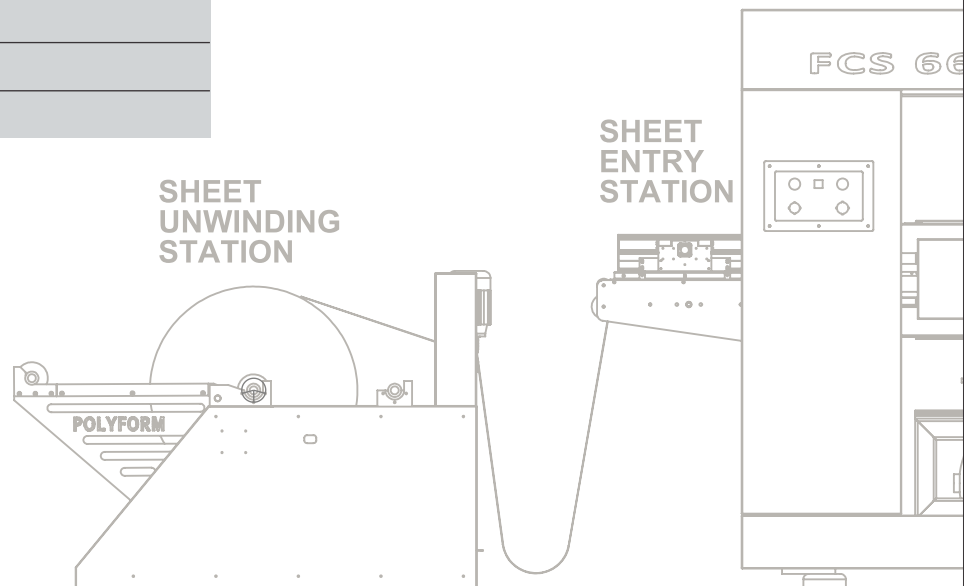

Heating with european efficient ceramic elements

Technical Data	:	FCS6655
Max. Forming Area	:	665mm x 540mm
Max. Forming height	:	100mm
Air Pressure	:	6 bar
Sheet Thickness	:	0.25 - 1.5mm
Material suitable	:	PP, PET, HiPS, OPS, PVC
Clamping force	:	50 tons
Cutting force	:	50 tons
Max. Cycle speed	:	40 cpm
Machine weight	:	8000 kgs

The machine is used for the manufacture of packaging products made of ®PET, PP, PS, OPS, PLA, PE and others.

All components are of internationally renowned brands to ensure higher degree of performance

Simple interface with visual touchscreen

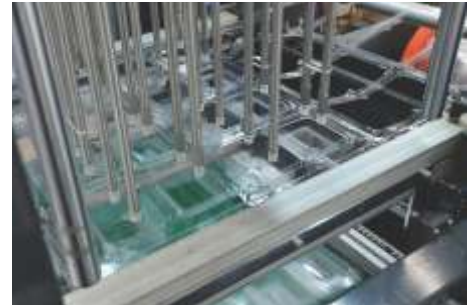

Forming and cutting station in solid steel cast structure with needle bearings for toggles

Higher clamping & cutting force better efficiency

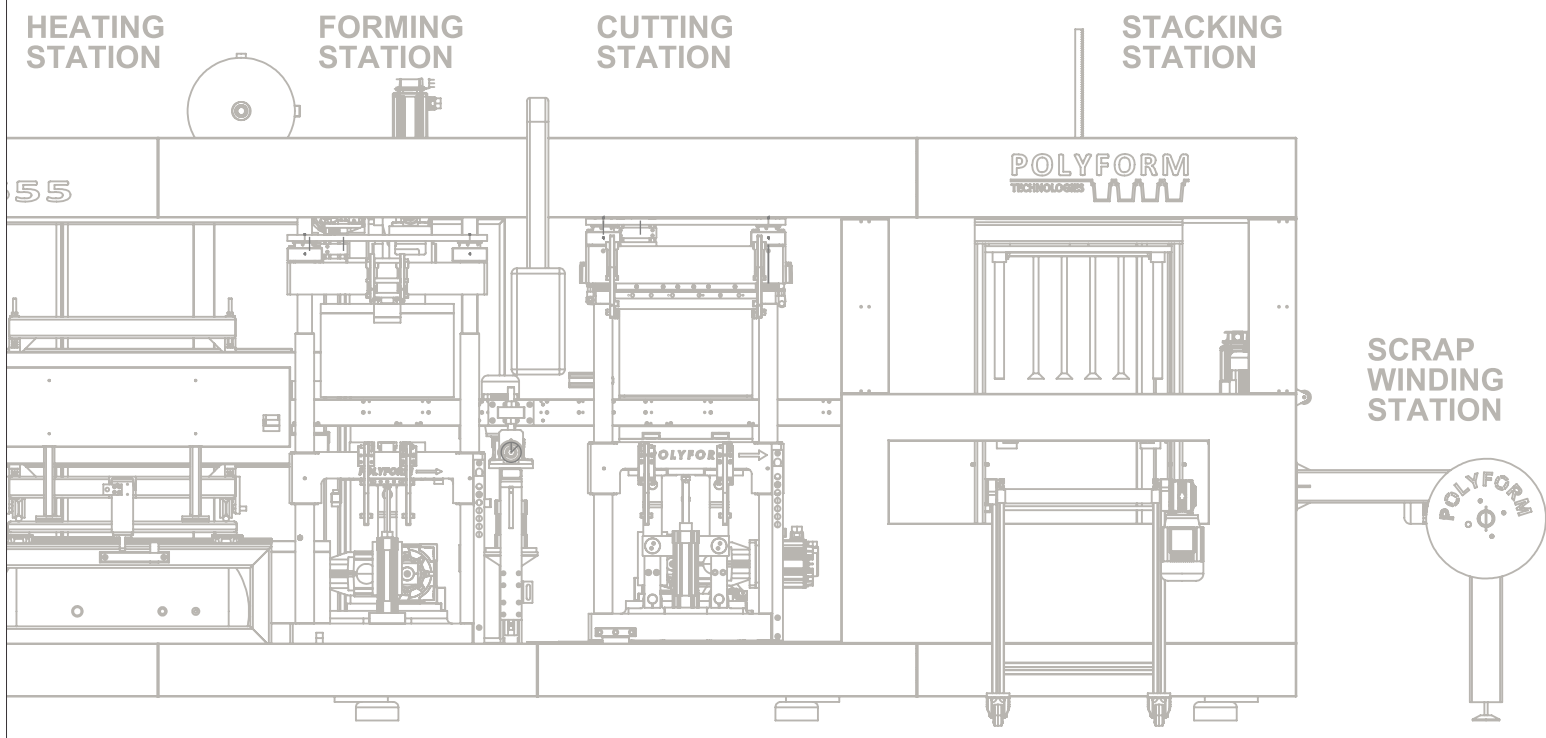

Flexible downward stacking / option of upward stacking

Independent servo-plug drive on upper table

Precisely integrated electronic control panel

Concept & design by **mithila** 8591696414

Turnkey solution with hardcore 30 years of experience of mould making

Forming your Future
